Special Feature

Calibrated Sandstone Paving

We are pleased to announce that we are now stocking calibrated sandstone at our Landscape Centre. This natural stone paving not only looks great but is so much easier to lay compared to the regular un-calibrated stone.

We are currently stocking mint in this range but have more colours on the way as we expect it to be very popular.

The usual 4 sizes of 300x300, 600x300, 600x600 and 600x900 with a thickness of 25mm are available. The sandstone has the same great natural finish and we have a special offer for 1 month of €18.50 + VAT per square meter. Why not take the hassle out of laying Sandstone Paving!

Allscape Display Under Construction

Allscape Display Area for you!

Here at Allscape we recognise that your client cannot visualise their patio by staring at a crate of sandstone.

Our resident Landscape Architect in conjunction with the sales staff have come up with a design for a new hard landscape display area.

The Display will showcase our top products which will be laid and built to the highest standards. We will also be introducing new products throughout the coming months.

The display can be used by all our customers to show their clients the various hard landscape options on offer and give them an accurate idea of how they will look in-situ.

We will keep you updated on the progress of your display area.
